Safety Instructions:

- Not suitable for children due to possible dangers from heavy parts and high weights. The product should only be operated by adults and kept out of the reach of children.
- Take care when handling heavy loads to avoid injury. Wear suitable protective equipment such as safety gloves, helmets and safety shoes.
- Check the product regularly for functionality and visible damage in order to avoid safety risks.
- Before use, ensure that the maximum load capacity (300 kg) is not exceeded. Excessive overloading leads to inaccuracies and malfunctions.
- The crane scale must be used on a stable, level surface and must not be used in damp or extremely cold environments in order to avoid malfunctions.
- Users should ensure that no persons are in the danger zone during the lifting process in order to avoid accidents.
- Read and follow the operating instructions carefully to ensure that the scale is used correctly and to guarantee readability for error-free measurements.
- Ensure that the crane scale is used in accordance with the general safety regulations and provide clear and understandable safety and operating instructions.
- Please do not overload the product, weight over 150 kg can lead to malfunctions.
- There is a risk of injury from falling loads if handled incorrectly.
- The product can cause serious injury if used incorrectly.
- Observe the readability to avoid incorrect measurements. Use the corresponding unit.
