Safety Instructions:

- Regularly check that the shelving unit is stable and secure.
- Do not exceed the maximum shelf load of 140 kg and the maximum bay load of 1200 kg.
- When fitting, ensure that the locking pins are inserted correctly.
- Avoid overloading the shelves to prevent them from tipping or collapsing.
- The shelf should not be placed near heat sources or damp locations.
- Children and unauthorised persons should be kept away from the construction and use of the shelving.
