Safety Instructions:

- Before use, ensure that the product is safe and in perfect condition. Carry out regular checks for damage to minimise possible risks.
- Lift heavy objects safely and do not exceed the maximum weight. Sharp or very heavy objects should be weighed with care to avoid damage.
- Caution: If used incorrectly, there is a risk of injury from falling objects.
- Ensure that the integrated wheels function properly and that the weighing beam is used on a stable, level surface to avoid the risk of falling.
- Read the operating instructions carefully and follow the safety instructions. Provide operating instructions and safety instructions in an understandable language.
- Avoid contact with water to prevent electrical hazards and note that the weighing beam should not be used in damp environments.
- Ensure that the safety-relevant area is observed when using the weighing beam.
- Ensure direct access to emergency information from the manufacturer or distributor.
- Warning: The product is not suitable for improper handling or excessive overloading and may cause injury.
