Safety Instructions:

- Ensure that the table is not overloaded: Maximum static load capacity 100 kg, maximum dynamic load capacity 60 kg.
- Keep the table away from sharp and heavy objects that could damage it.
- Only use the electric height adjustment in accordance with the instructions to avoid injury and mechanical damage.
- Avoid overloading the desk beyond the specified load capacity.
- Make sure that the table stands securely on a stable, level surface to prevent it from wobbling and tipping over.
- Keep the area around the electrical components free of water or other liquids to prevent damage and risk of electric shock.
- Regularly check the stability of the table frame and the function of the electrical components.
- Ensure that the electrical connections are not damaged and watch out for tripping hazards.
- Read the operating instructions carefully before using the device for the first time and each time you modify it.
- Prevent children from accessing the electrical controls to avoid accidental activation of the height adjustment.
- Make sure that there are no objects in the adjustable range when adjusting the table height.
- When using the table: Children should not play unsupervised near the appliance.
- Do not touch any electrical components directly to avoid electric shocks.
- Remove cables and small parts to minimise the risk of injury or suffocation.
- The height should only be adjusted if no persons are endangered.
- Be aware of the risk of crushing when adjusting the table height.
- Only use the table in accordance with the manufacturer's instructions.
