Safety Instructions:

- Risk of suffocation due to loose cables and small parts, keep away from children and lay properly.
- Risk of electric shock due to improper use of electrical components; do not bring electrical parts into contact with water.
- Risk of injury if height adjustment is not carried out correctly; use with care and activate collision protection.
- The table should be placed on a stable, level surface to prevent it from tipping over and causing injury.
- Maximum load capacity: do not exceed the dynamic load of 60 kg and the static load of 100 kg.
- Children should be supervised, no sole use by children to avoid injury from moving parts.
- Regularly check the condition of cables, electrical components and the table to prevent damage and injury.
- Ensure that installation is carried out in accordance with the manufacturer's instructions to ensure stability.
- Do not use in damp environments or near water to avoid the risk of electric shock.
- Read and follow the operating instructions before installing and using the table.
- Do not use the table as play equipment or in conjunction with the memory function unless it is operated safely by an adult.
- Install cable management safely to avoid tripping hazards.
- Avoid operating the table with other devices to prevent overloading.
