Safety Instructions:

- Observe safety precautions for handling hazardous liquids.
- Do not fill the container beyond the maximum filling quantity and close it securely when not in use and before transport.
- Hazards such as leakage or damage to the container can occur if handled improperly.
- Ensure access to the safety data sheets (SDS) of the transported liquids.
- Keep containers away from heat sources and direct sunlight.
- Ensure use and storage in accordance with applicable national and international regulations.
- Risk of suffocation and electric shock if hazardous substances and the outlet valve are used improperly.
- Caution: IBC containers are not suitable for the transport of unauthorised liquids.
- Keep out of the reach of children, as the container could be misunderstood.
- Empty and clean the container before storage to avoid residues.
- Ensure correct labelling in accordance with UN regulations when transporting chemicals.
