Safety Instructions:

- Ensure that the material cupboard is not used as a toy by children and keep the cylinder lock keys out of the reach of children to prevent unauthorised access.
- Regularly check the stability of the shelves and do not exceed the load capacity of 35 kg per shelf.
- Only use the cabinet on a level surface and ensure that it is stable to prevent it from tipping over and falling.
- Read the assembly and operating instructions carefully in order to assemble and use the cabinet correctly.
- Before using for the first time, check all parts for correct assembly and operation.
- Avoid carrying heavy materials alone to prevent injuries.
- Place the cabinet in the storage space in such a way that unauthorised access to sensitive materials is impossible.
- Close the doors completely and use the cylinder lock to prevent unauthorised access.
- Check the hinges regularly to ensure that they are in good working order in order to guarantee noise-reducing and problem-free operation.
- In the event of improper use, proceed with caution to avoid injuries caused by collisions with open doors or falling objects.
