Safety Instructions:

- The table must be placed on a stable and level surface to avoid the risk of tipping.
- The maximum dynamic load capacity of the table is 60 kg; the static load capacity is 100 kg. These limits must not be exceeded.
- The electrical components may only be used for their intended purpose in order to avoid the risk of electric shock. Protect from water.
- Only authorised personnel should operate the electric height adjustment within the specified range of 645 mm to 1305 mm to avoid injury.
- Check for damage before installation and use; do not use if damage is visible.
- The product is not suitable for children and should be kept away from them.
- Choking hazard due to small parts, especially when assembled or incorrectly used by children.
- Risk of injury due to crushing if the height adjustment is used incorrectly; ensure that no parts of the body are trapped.
- Avoid writing on the tabletop with sharp objects to prevent damage.
- Use the floor levelling screws to ensure stability on uneven floors and prevent tipping.
- Lay cables securely to avoid tripping hazards and prevent damage.
- To prevent injury, do not allow children access to electrical controls.
- Ensure that the table is not positioned in areas where it could become an obstacle.
- Ensure the necessary safety distance around the table to prevent damage from objects in the movement area.
- Read the operating instructions carefully before first use and keep them in a safe place to ensure safe handling.
