Safety Instructions:

- Place the shelf on a stable, level surface to ensure stability.
- Observe maximum load capacity: 100 kg total, 50 kg per shelf to avoid overloading and instability.
- Ensure that the shelves are correctly and securely installed to prevent them from tipping over.
- Fasten the shelf securely to the wall to prevent it from tipping over.
- Keep children away during assembly and use to minimise the risk of injury.
- Ensure careful installation and use only for the intended purpose.
- Protect the product from moisture and extreme temperatures to prevent damage.
- Wear shoes and protective gloves and take safety precautions during assembly and when loading heavy objects to avoid injury.
- Store heavy objects in the lower half of the shelf to minimise the risk of tipping over.
- In the event of improper installation, contact customer service.
- Observe all safety-related instructions and labelling.
