Safety Instructions:

- Do not load more than 50 kg per shelf to avoid overloading.
- Do not overload the shelving unit to prevent tipping or structural damage.
- Ensure that the shelving unit is placed on a stable and level surface to prevent it from tipping over.
- Watch out for sharp edges and corners, especially when manufacturing sheet steel.
- Do not place the product near sources of heat or fire to prevent material damage.
- Use only for the intended purpose in office and storage areas.
- Danger due to improper installation: Follow the installation instructions carefully to avoid the risk of accidents.
- Child safety: Keep the product out of the reach of children to avoid injury.
- Before assembly, ensure that the structure is level and stable to prevent the risk of tipping.
- Properly adjust height-adjustable shelves and provide handling instructions.
- Store securely to prevent injuries from falling over or dropping heavy objects.
- Regularly check the stability and integrity of the shelving unit.
- When transporting or assembling the shelving unit, suitable aids should be used to prevent injuries.
- Ensure that all screws and connections are firmly tightened before use.
- Signal word for safety instructions: Read all safety instructions and the installation instructions before use.
