Safety Instructions:

- Observe the maximum operating temperature of -25°C to +100°C.
- Only use the container for liquids in packaging groups II and III.
- Ensure that the safety valve is checked before commissioning.
- Secure the container during transport and storage to prevent accidents.
- Avoid using the container for inferior materials that could jeopardise its integrity.
- Comply with all applicable regulations for the transport of dangerous goods (ADR, RID, IMDG Code).
- Ensure that the container is not overfilled to avoid overpressurisation.
- Check regularly for leaks and ensure that seals are in good condition.
- The product should be labelled in a language that is understandable to users, including safety instructions.
