Safety Instructions:

- The shelf may only be set up on level and stable surfaces to prevent it from tipping over.
- Do not exceed the maximum shelf load of 60 kg per shelf.
- The total field load of 240 kg must not be exceeded.
- To ensure stability, the shelving must be assembled and secured in accordance with the instructions for use and checked regularly for stability and safety.
- Small parts could pose a choking hazard, especially for children, so store safely.
- Assembly should only be carried out by persons of legal age.
- When using the telescopic runners, ensure that they are not blocked and are operated gently.
- Do not use the shelf for improper use as a staircase or ladder.
- The shelf should be securely fastened to the wall to prevent it from tipping over under heavy loads.
- The product must be delivered in a disassembled state and must be assembled in accordance with the instructions.
