Article Numbers: 409981, 406411, 401951, 401649, 401629, 401569

Safety Instructions:

- Observe the maximum load capacity of the shelves; for specific variants max. 450 kg, exceeding this is risky.
- Place the shelving unit on a stable, level surface to prevent it from tipping over.
- Clear positioning of the cupboard away from children; stow away small parts safely for childproofing.
- Check the cabinet regularly for stability and tighten all screw connections to ensure safety.
- Do not overload the cabinet, especially with suspended loads, and keep heavy tools in lower compartments for stability.
- Avoid overloading the shelves beyond the maximum load capacity.
- Ensure that enclosure units are properly installed, especially if the floor is uneven (floor levelling of 25 mm is possible).
- Use accessories and monitors safely and only use the cabinet for its intended purpose.
- Wear protective gloves when assembling or handling sharp edges to prevent injury.
- Keep the cabinet away from water and extreme temperatures to protect against corrosion.
