Article Numbers: 402649, 402647, 402646, 402645, 402642, 402641

Safety Instructions:

- Only use the cabinet for its intended purpose in order to avoid damage and injury.
- Before opening the cabinet, place it in a stable position on a level surface and, if the floor is uneven, ensure that the floor is levelled out by 25 mm to prevent it from tipping over.
- Observe the maximum load of the shelves (up to 50 kg each); the total load capacity of the cupboard is 250 kg. Ensure that the shelves are inserted correctly to avoid overloading.
- Do not block the ventilation openings in the plinth to ensure good air circulation and prevent moisture from forming.
- Secure the cabinet to the wall and always keep it locked to prevent unauthorised access. Keep keys out of the reach of children.
- Cabinet can be heavy; take care during transport and assembly. Observe safety precautions when handling heavy objects.
- Risk of suffocation from small parts during assembly; avoid improper handling of the cabinet contents.
- If electrical appliances are stored, only use them on earthed sockets to avoid the risk of electric shock.
- Keep the cabinet dry to prevent rust from forming.
