Safety Instructions:

- Make sure that the cabinet is placed on a level and stable surface to prevent it from tipping over.
- Observe the maximum load capacity of 450 kg for the entire cabinet and the specific load capacities of the shelves to avoid overloading.
- Only open doors up to an angle of 110° to prevent damage.
- Ensure doors are lockable to prevent unauthorised access. Check the functionality of the lock regularly.
- The cabinet is not designed for use by children or outdoors in order to prevent injury and material damage.
- Take care when handling doors and sharp edges to avoid crushing and injuries.
- Use floor levelling to prevent tipping, especially on uneven surfaces.
- Avoid placing the cabinet near heat sources or damp environments to prevent material damage.
- When not in use, lock the cabinet and prevent unauthorised access.
- Avoid contact with aggressive cleaning agents to prevent surface damage.
- Ensure that the cabinet is only used for the intended loads.
