Safety Instructions:

- Place the cabinet on a stable, level surface to prevent it from tipping over.
- Do not exceed the maximum load of the shelves (100 kg each) and drawers (50 kg each).
- Lock the cabinet and close the doors and drawers properly to prevent unauthorised access and injury.
- Protect the cabinet from corrosion and damage by avoiding sharp or corrosive substances and using suitable cleaning agents.
- Avoid overloading drawers and compartments in order to minimise damage and the risk of injury.
- Keep the cabinet dry and do not expose it to direct sunlight.
- Use safe lifting practices as the assembled cabinet may be heavy.
- Carry out installation and use in accordance with the operating instructions to ensure safety.
- Keep children away from the cabinet to avoid injury from improper use.
- Ensure that there is no risk of entrapment when opening the doors and drawers.
- Do not store hazardous substances and chemicals in order to avoid hazards.
- Only use the cabinet for its intended purpose and ask the manufacturer about its safety of use if you are unsure.
- Ensure ventilation to avoid waterlogging.
- To ensure stability, do not tilt or overload the cabinet.
