Safety Instructions:

- Set up securely to prevent the cabinet from falling over and ensure that it is on a stable, level surface.
- Observe maximum load per shelf: Upper 7 shelves up to 50 kg and lower 3 shelves up to 100 kg, total load should not exceed 450 kg.
- Secure the cupboard for storing small parts, as there is a risk of suffocation if small parts are handled incorrectly.
- Doors may only be operated up to a maximum opening angle of 110° to avoid the risk of injury.
- Lock the cabinet with the keys provided to prevent unauthorised access and ensure that the key is stored securely.
- Ensure good air circulation and do not block ventilation holes to prevent moisture from forming in the cabinet.
- Regular inspection of the cabinet for stability and wear is recommended.
- Take care when handling heavy objects on the upper shelves due to the risk of falling.
- Strength is required to lift or move the 23 kg product.
- When fitting perforated grid panels, use sturdy hooks and mount them properly to prevent them from falling.
- Be aware of the risk of injury from sharp edges when fitting the shelves.
- Always tighten or replace deviating safety products (such as locks and rubber buffers) to avoid the risk of injury when closing the doors.
- Avoid safety risks due to improper use of the lockable cabinet.
- Keep children and unauthorised persons away to avoid injury.
