Safety Instructions:

- Set up securely to prevent tipping: Make sure that the cabinet is on a stable base, a stable and level surface, and ensure proper assembly.
- Do not exceed the maximum load capacity of 450 kg. Pay attention to the load capacity when using accessories and when fitting the shelves.
- Distribute heavy objects evenly on the shelves, preferably on the lower shelves, to ensure stability.
- Avoid aggressive chemical cleaning agents so as not to damage the powder coating.
- Take care to hold the doors at the maximum angle of 110 degrees when opening and avoid opening with excessive force to prevent damage to hinges.
- Keep the cabinet clean and free of dust and other materials. Do not block the ventilation holes to prevent mould growth.
- Secure the cupboard with the rotary handle with cylinder lock and keep it locked when it is not in use.
- Only use the keys included in the scope of delivery to ensure security and prevent unauthorised access.
- Use the cabinet as intended; do not use it as a work surface, ladder or standing surface.
- Risk of suffocation from small parts if used incorrectly. Risk of injury due to improper handling or overloading the shelves. Risk of crushing when closing the doors.
- Regularly check the condition of the door buffers and hinges for signs of wear.
- The cabinet is only intended for the storage of non-hazardous and non-toxic tools and materials.
