Safety Instructions:

- Avoid the risk of suffocation due to improper use of the cylinder lock and small parts (e.g. labels, keys).
- Risk of injury from sharp edges and improper closing of the doors. Avoid sharp edges and install correctly.
- The clothes locker is heavy (weight: 66.70 kg). Safe transport and installation on a stable, level surface is required to prevent tipping.
- Observe the maximum load per compartment and do not overload the locker to ensure stability.
- Ensure stability through correct levelling and regular maintenance of the lock and hinge mechanisms.
- The locker is protected against break-ins, but security turnbolts or cylinder locks should be used correctly and the locker should be secured if keys are lost.
- Avoid overstretching the doors (open to a maximum of 90 degrees) and secure them with door opening limiters to prevent damage.
- Keep the ventilation openings clear to prevent the formation of mould and unpleasant odours.
- Check the plastic feet and levelling system regularly to prevent corrosion and damage to the surface.
- Keep the product away from children to avoid injury and the risk of choking.
- Do not use aggressive cleaning agents to avoid damaging the surface of the spindle.
- Do not use near heat sources or in humid environments to avoid material damage and moisture problems.
- Before using padlocks, ensure that they are securely fastened with a shackle thickness of 6 to 8 mm.
