Safety Instructions:

- Choking hazard due to small parts - keep away from children and ensure that all parts are correctly assembled.
- Risk of injury from sharp edges or corners - take care when handling and installing.
- Risk of slipping on smooth or uneven surfaces - check stability regularly and use levelling device.
- Risk of break-in due to weak locks - note that the product is not completely burglar-proof.
- Safe use in accordance with the manufacturer's instructions - observe safety information and correct use.
- Regular inspection for damage and signs of wear - check before use.
- Place the locker on a stable and level surface - avoid the risk of tipping over.
- Children should not use the product as play equipment and should not be left unattended.
- Use padlocks at your own risk - observe key security.
- Corrosion protection - Keep the product dry and do not clean with water or damp cloths.
- Danger from mechanical parts - be aware of the risk of injury if used incorrectly.
- Observe the door opening limiter - prevent the doors from overstretching, maximum 90 degree opening.
- Do not block ventilation openings - for proper air circulation.
- Do not transport with sharp or pointed objects - coatings may be damaged.
- Do not exceed the maximum load capacity of 50 kg per compartment - Carry out regular stability checks.
- Product is made of robust, durable steel - protection against corrosion and UV rays.
- Be aware of sharp edges or the risk of crushing - especially during assembly.
- Product can be damaged if handled incorrectly - be careful when handling valuables.
- Set up out of the reach of children - to prevent misuse and injury.
- Regular maintenance and cleaning with suitable agents - contribute to longevity.
