Safety Instructions:

- Only use the product in the intended manner to avoid injury and damage.
- The product is not suitable for use by children without adult supervision.
- Make sure that the locker is placed on a stable, level surface to prevent it from tipping over.
- Ensure that the base is correctly adjusted for stability, especially on uneven ground.
- Keep the product away from heat sources, moisture and direct sunlight to prevent corrosion.
- Ensure adequate ventilation to prevent mould growth by keeping the ventilation openings clear.
- If the product is damaged or worn, discontinue use and contact the manufacturer.
- Regularly check the stability, locks and door opening limiters to ensure safety.
- Avoid overloading the doors and ensure that they are not overstretched to prevent damage.
- Avoid risk of injury due to improper use of safety twist locks, observe safety measures.
- Clean the locker regularly with suitable agents to protect the surface and prevent damage to the coating.
- Make sure that children cannot reach any small parts or label frames to avoid the risk of suffocation.
- Incorrect assembly, use or loading can result in hazards, e.g. risk of falling.
- Only use the designated keys and locks to ensure security.
- The construction is burglar-resistant in accordance with level C of DIN 4547, but caution is advised in the event of improper handling.
- The door opening limiter must be used correctly to prevent damage to the locker doors.
- Take protective measures when transporting the Spindles as the product is heavy (60 kg).
- Use padlocks with a shackle thickness of 6 to 8 mm if security turnbolts are used.
- Be aware of the risk of suffocation due to improper handling of small parts.
- Watch out for sharp edges or corners on the doors to avoid injury.
