Safety Instructions:

- Choking hazard due to small parts: Not suitable for children under 3 years of age. Keep small parts away to avoid the risk of choking.
- Risk of injury due to improper use: Do not overstretch doors. Use door opening limiters to prevent overstretching.
- Ensuring stability and correct installation: Install the product correctly and place it on a stable, even surface to prevent it from tipping over.
- Beware of sharp edges: Avoid risk of injury from sharp edges during assembly and use.
- Regular maintenance and inspection: Check safety equipment and stability regularly to avoid breakdowns and structural damage.
- Safe handling and use: Use only for the intended purpose. Carefully read and follow the instructions for installation and use.
- Safety for children: Keep product out of reach of children and use under supervision to prevent misuse.
- Use of suitable cleaning agents: Do not use aggressive cleaning agents that could damage the surface.
- Do not block the ventilation openings: Ensure proper ventilation to prevent mould growth and overheating.
- Padlocks and security mechanisms: Only use suitable padlocks to prevent unauthorised access. Use a security twist lock.
- Do not exceed the maximum door opening width of 90 degrees to avoid damage.
- No heavy overloading: Avoid overloading the shelves and coat rails to prevent them from tipping over or breaking.
- Material and construction properties: Avoidance of health risks through suitable materials and stable construction.
