Safety Instructions:

- Ensure that the doors are not overstretched and that the door opening limiters are observed to prevent injuries.
- Avoid using the spindle for hazardous or harmful substances and ensure that it is not used in damp or extreme environments to prevent corrosion.
- The cabinet should be placed on a stable and level surface and levelled for stability.
- Observe the maximum load capacity of the seat, shelf and coat rail; avoid overloading to prevent breakage or tipping over.
- Protect yourself from sharp edges and corners that can cause injury by being careful when handling.
- Only use the locks and latches provided to ensure security. Close security twist locks properly to prevent unauthorised access.
- Take care when opening and closing the doors to avoid crushing and risk of injury due to improper handling.
- Product is not suitable for use by children under 3 years of age and should be kept out of their reach.
- When cleaning, take care not to get any liquids into mechanical parts in order to avoid malfunctions.
- Keep the cabinet away from heat sources and ensure that it is suitable for dry indoor areas to prevent damage.
- Regular inspection of the stability and safety of the construction is recommended to avoid accidents.
- Choking hazard due to small parts, such as locks and fastenings, and due to improper use or overfilling of the cupboard.
