Safety Instructions:

- Risk of overloading if the load capacity of 50 kg is exceeded; do not overload the drawer.
- Ensure that the drawer unit is securely mounted and correctly inserted into the cabinet to prevent it from tipping over.
- Not suitable for use by children. Ensure that children do not play with the drawer or open it.
- Include operating instructions and safety information to ensure safe use and follow the instructions carefully to ensure proper function.
- The drawers are fitted with a full-extension runner to minimise the risk of tipping over; be careful when opening and do not pull out drawers with force.
- The product should only be used for its intended purpose. Improper use can lead to injury or damage.
- Edges and surfaces are potentially sharp; take care when handling during assembly.
- Check for significant damage before use to ensure safety.
- Take care when handling sharp objects in the drawers.
- The use of heavy objects in the drawers is at your own risk.
- The drawer unit is intended for indoor use; do not use outdoors.
