Safety Instructions:

- Do not place any objects on the sloping roof or cupboard plinth to minimise the risk of falling and accidents.
- When installing, follow the manufacturer's instructions exactly, only do so under the supervision of a specialist and use suitable protection to ensure safety and stability.
- The product is not designed for climbing or weight bearing and should not be used in children's environments without special precautions.
- Regular inspection and maintenance of the sloping roof attachment for damage, more stringent in areas with children, to minimise safety risks.
- Keep the product away from sources of fire to avoid the risk of fire and only use suitable cleaning agents to protect the steel surface.
- Check the maximum load limits of the surface to avoid structural damage and overloading.
- The sloping roof attachment must be properly inclined to prevent objects from being left behind.
- During installation, ensure that there are no sharp edges that could pose a risk of injury, especially when handling steel material.
- The product should be used according to the intended specifications in the designed context (work and social spaces).
