Safety Instructions:

- Wear appropriate personal protective equipment, including safety goggles and gloves, to avoid injury.
- Wear eye protection when drilling to prevent eye injuries from swarf.
- Take appropriate precautions to deal with high cutting forces and the danger of sharp edges on the drill bit.
- Keep the work surface clean and tidy to avoid tripping hazards and accidents.
- Ensure that the drill bit is correctly clamped in the chuck to prevent it from slipping during operation.
- Do not overload the drill bit during use to prevent overheating and damage.
- Read the operating instructions before use and observe the maximum speed of the drill.
- Only use the drill with the designated drill to avoid safety risks and damage.
- Check the drill bit for damage or wear before each use and do not use if damaged.
- Store the appliance correctly and keep it out of the reach of children.
- Ensure access to a first aid kit if injuries occur during use.
- Avoid leaving the drill unattended when switched on to reduce safety risks.
- Do not use in the vicinity of flammable materials or at extreme temperatures.
