Safety Instructions:

- Always use suitable personal protective equipment such as safety goggles and gloves to avoid injury.
- Keep the work area clean and well lit to avoid accidents.
- Keep the drill away from children and store it safely.
- Only use the drill bit for the intended materials to avoid damage and injury.
- The drill bit should only be used with suitable drilling machines.
- Before use, check that the drill is in a safe condition and without visible damage.
- Avoid direct physical contact with the drill during and after use to prevent injury.
- Ensure that the work surface is free of obstacles and hazardous materials to prevent accidents.
- Avoid overheating and overloading the drill bit by using appropriate feed rates and cooling.
- Disconnect the drill from the power supply when it is not in use.
- Follow the manufacturer's instructions and safety information before use.
- Handling only by trained personnel to avoid injury.
- Only use the drill in well-ventilated areas to avoid the accumulation of swarf.
- Take care when using in the vicinity of flammable materials or electrical cables.
- If the drill bit shows signs of wear or damage, replace it.
