Safety Instructions:

- Always wear safety goggles to protect your eyes from chips and dust.
- Use suitable personal protective equipment such as safety goggles, gloves and hearing protection to avoid injury.
- Use only for the intended purpose; not suitable for children and keep away from children.
- Ensure that the drill bit is correctly clamped in the drill chuck to prevent it from slipping or flying out.
- Check tools for damage before use and replace damaged tools immediately.
- Keep long hair and loose clothing secured and away from the machine and the rotation axis of the drill.
- Do not use the drill in damp environments as this can lead to electrical hazards and corrosion.
- Keep the work area and workshop clean and free of obstacles to prevent falls or injuries.
- Secure the workpiece during the drilling process to prevent movement or slipping.
- Read and understand the operating instructions and safety instructions carefully before use.
- Avoid contact with the tool tip during operation and with the rotating surface to prevent injuries.
- Do not use in the vicinity of flammable materials to avoid the risk of fire.
- Only carry out drilling operations when the workpiece is stable and securely supported.
- Improper handling may result in injury due to sharp edges or overheating of the drill bit; use lubricant if necessary.
- Store the tool in a dry, safe place, out of the reach of children, to prevent rust, corrosion and accidents.
- Avoid overloading the drill bit; always use the recommended speeds and feeds.
- Observe the manufacturer's safety instructions, especially when drilling in different materials.
