Article Numbers: 709257, 709256, 709255, 709254, 709253, 709252

Safety Instructions:

- Please note that use in aggressive environments requires special care. Take care when using in the vicinity of aggressive chemicals.
- Avoid contact with extreme temperatures outside the specified range of -80 °C to +538 °C. When using in extreme environments, always pay attention to the temperature resistance (-80 °C to +538 °C). When used in environments with extreme temperatures, ensure that the authorised temperature limit of -80 °C to +538 °C is not exceeded.
- The ball lock is secured to ensure a secure connection; make sure it is properly closed.
- Injuries can occur if used incorrectly. Only use the cable ties for their intended purpose. Before use, ensure that the cable tie is not overloaded.
- Store the cable ties in a dry place and protect them from direct UV rays to ensure their longevity.
- Clear safety instructions and identification information must be provided. Safety information and instructions for use must be included.
- Not suitable for children and keep out of reach of children, as there is a risk of suffocation from small parts.
- Do not use to hold persons or animals.
- Caution! The cable tie may splinter if used incorrectly. Beware of sharp-edged ends when handling the cable ties.
- Not suitable for applications that are exposed to permanent mechanical stress.
- Dispose of in an environmentally friendly manner after use.
- Observe the recommended storage conditions in order not to impair the corrosion resistance.
