Safety Instructions:

- Always wear a hard hat when you are in potentially dangerous areas or when working with risks.
- Keep the safety helmet clean and undamaged.
- Check the helmet for visible damage and the functionality of the safety elements before each use. Regular inspections are important.
- Avoid modifications to the helmet that could impair the safety function.
- Make sure that the helmet fits correctly and that the signal-coloured surface maintains visibility.
- The helmet offers protection against the cold down to -30 °C and is not suitable for use in temperature ranges above 50 °C. Do not use it in extreme temperatures or in areas with explosive atmospheres.
- The helmet is not certified as protection against electrical hazards. Additional protective equipment is required when working in the vicinity of electrical installations.
- Keep the helmet away from chemical substances, direct sunlight and physical damage caused by strong impacts or pressure.
- Only use the helmet for its intended purpose in accordance with the EN 397 standard and the safety regulations. The manufacturer's instructions must be followed for individual adjustments such as the attachment of accessories.
