Safety Instructions:

- Adjust the safety helmet correctly for optimum fit; ensure that it fits correctly before use.
- Only use for the intended area of application such as construction and agriculture.
- Check the helmet regularly for damage and replace if defective.
- Protect from excessive heat, chemical substances and naked flames.
- Take particular care in the event of an earth current or contact with electrical cables; can lead to electric shocks without insulation.
- Do not block the ventilation openings to ensure air circulation.
- Not intended for sporting activities or leisure games.
- Do not continue to use in the event of strong external influences, e.g. after a heavy impact.
- Designed for commercial use, not for private use.
- Does not offer protection against mechanical impacts beyond EN 397.
- Not suitable for extreme temperatures or contact with chemicals.
