Safety Instructions:

- Safety helmet fulfils the EN 397 and EN 12492 standards for professional and industrial climbing helmets.
- Use of the helmet with integrated face protection increases the protection of the face.
- Dual chin strap system provides a secure fit, especially when working at height.
- Make sure that the helmet fits correctly and is not damaged before you use it.
- The ventilated structure ensures pleasant air circulation, but watch out for potential distractions at work.
- The helmet is made of robust ABS material that offers good protection in the event of contact with heavy objects or impact.
- Regular inspections of the helmet for damage are necessary to ensure safety.
