### Safety Instructions:

- Always use personal protective equipment such as safety goggles and gloves when handling the hole saw.
- Keep the work areas well lit and free of obstacles during operation.
- The hole saw may only be used with suitable drilling machines to minimise the risk of injury.
- The cutting speed and pressure force should be set according to the materials being processed in order to avoid overheating and material breakage.
- Store the hole saw in a safe, dry place to prevent rust and damage.
