Safety Instructions:

- The safety goggles are not suitable for direct visual contact with sunlight.
- Remove the glasses immediately if there are any signs of damage or distortion of vision.
- Before use, ensure that the safety goggles comply with the applicable safety standards (EN 166 and EN 170).
- The polycarbonate lens offers limited protection against impact. Not suitable for high-energy impact applications.
- Before use, always ensure that the spectacles fit correctly and that there are no gaps to the sides.
- The goggles are not suitable for protection against chemical or biological hazards.
- Unsuitable for children as there is no specific suitability or certification for children's products.
