Safety Instructions:

- Risk of suffocation due to possible sharp edges of the rounded aluminium frame and improper handling of small parts.
- Risk of breakage of the toughened safety glass if handled incorrectly; take care during transport and installation.
- Risk of injury due to improper assembly, extensions and handling of the display case; carry out assembly in accordance with the instructions and check stability regularly.
- For indoor use only and do not make any changes to the structure.
- Only allow access to locked contents with a key; lock cylinder lock securely to prevent unauthorised access.
- Aluminium frame Risk of injury: Minimised by rounded design, but caution in the event of collisions and improper handling.
- Not designed for use by children; may be attractive to children, therefore observe child safety precautions.
- Sliding doors with cylinder lock: Keep the key out of the reach of children and avoid tampering to prevent damage.
- Safety glass certified to DIN 1249, EN 12150 for better protection of contents.
- Attach visible warning notices on the safe use and operation of the display case.
