Safety Instructions:

- Avoid damaging the chair through shocks, impacts or excessive pressure.
- Make sure that you do not exceed the maximum weight limit of 125 kg.
- The seat height should be checked regularly and constantly adjusted to avoid health problems.
- Keep the chair away from naked flames and direct heat sources to avoid the risk of fire.
- Avoid standing with your feet on the armrests or leaning back into the chair with excessive force.
- Ensure that all parts are correctly secured after assembly to prevent lines and falls.
- The safety gas lift should only be adjusted by adults.
- Only a mild cleaning agent should be used to clean the PU leather in order to avoid damage.
