Safety Instructions:

- Ensure that the laboratory chair is used safely to avoid injury. The chair should only be used for its intended purpose and by one person at a time. Do not use the chair beyond the maximum weight load: 100 kg or 120 kg depending on the model.
- Carry out regular inspections for damage to the cover, frame and other parts. Check screws and connections regularly for strength and stability.
- Safety instructions for use only on firm, level floors to prevent tipping. Ensure that the chair is placed on a stable surface to prevent it from tipping over.
- Avoid contact with sharp objects and do not use abrasive cleaning agents so as not to damage the artificial leather. Use suitable disinfectants for cleaning.
- Seat height and depth should be checked and correctly adjusted to ensure ergonomic use. Ensure that the seat height does not exceed the maximum height.
- In the event of a defect or damage, discontinue use immediately and contact the manufacturer.
- Keep the product away from children. Use by children is not recommended as it is not designed for this use.
