Safety Instructions:

- Observe the maximum load capacity. Do not exceed the maximum load of the chair to avoid structural damage and injury.
- Do not exceed the seat height, be careful when using the gas spring height adjustment.
- Ensure that the chair is placed on a stable, level surface to prevent it from tipping over.
- Check regularly for wear. Check the stability of the chair and castors regularly.
- Use only on flat surfaces.
- Use non-slip floor coverings.
- In the event of improper installation or use, contact the manufacturer.
- Avoid leaning backwards too much during use to minimise the risk of falling injuries.
- Ensure that all screws, fasteners and joints are regularly checked for strength to guarantee safe use.
- The chair is not suitable for use in environments with high chemical exposure and damp environments.
- Replace glides when they are worn.
- Not suitable for children and vulnerable persons due to mechanical risks. Not suitable for children under 3 years of age as small parts may be present. Use is not recommended for children under 14 years of age.
- Before use, ensure that the external conditions of the product correspond to the specific conditions of use in the laboratory.
- Keep the chair clean and carry out regular maintenance.
- Avoid sitting if the gas spring is damaged.
- Clean the surface of the artificial leather with suitable disinfectants, keep the sharpest objects away from the seat surface.
- Keep the chair away from direct heat sources.
- Risk of electric shock due to improper use of electrical components.
- The artificial leather is antibacterial, but follow the care instructions to prevent damage.
