Safety Instructions:

- The workbench must not exceed a maximum load of 750 kg. A maximum load of 50 kg per shelf applies to shelves.
- Distribute heavy loads evenly and ensure that the workbench is stable on a level surface to prevent it from tipping over.
- Anchor the workbench to the floor to prevent it from tipping over.
- Ensure secure installation and make sure that all parts are firmly connected.
- Keep the workbench clean, free of objects and oil to minimise the risk of tripping and slipping.
- Protect the workbench from extreme temperatures, moisture and aggressive chemicals, especially as it is made of MDF.
- Avoid contact with sharp objects and sharp edges in the work area.
- Use suitable personal protective equipment (PPE) during assembly and use to avoid injury.
- Use the ESD protection functions in sensitive areas and avoid use in damp environments.
- Secure the storage space with the cylinder lock to prevent unauthorised access.
