Safety Instructions:

- Observe maximum load: 750 kg to avoid structural damage or injury.
- The drawers can bear a maximum load of 80 kg; avoid overloading.
- The workbench must be firmly anchored to the floor to prevent it from tipping over.
- Observe ESD protective measures to prevent damage from electrostatic discharge.
- Only use the workbench for its intended purpose and on a stable, level surface to prevent it from tipping over.
- Use suitable personal protective equipment (e.g. gloves, safety goggles) when handling heavy or chemically treated materials.
- Regularly check the stability of the workbench and the functionality of the drawers and cupboard doors for secure locking.
- Be aware of and avoid the risk of injury from sharp edges or moving parts.
- Avoid using aggressive chemicals that could damage the surface.
- Distribute heavy objects evenly over the surface and do not load them beyond the maximum load-bearing capacity.
- Regularly check all electrical connections, even without electrical components, to ensure safety.
- Keep the work area free of water and excessive moisture to prevent damage.
