Safety Instructions:

- Only use the workbench in accordance with the manufacturer's instructions. Do not use for other purposes or as a platform.
- The maximum load capacity of the workbench of 750kg must not be exceeded in order to avoid structural damage and accidents.
- Do not overload drawers. Maximum load per drawer: 80kg.
- A stable and level base is required to prevent the workbench from tipping over.
- Ensure that all drawers are properly closed to prevent tools from falling out.
- Ensure protection against external influences such as chemicals, water and oils.
- Check the workbench regularly for damage, wear and tear and functionality.
- Use suitable personal protective equipment, such as gloves and safety goggles, when working with the workbench.
- Take care when using in sensitive areas: Observe ESD protection measures.
- Edges can be sharp, caution is advised.
- Securely fasten the workbench to the floor; ensure stability under heavy loads.
- Choking hazard due to small parts. Store safely.
- Not suitable for children; avoid unauthorised use.
