Safety Instructions:

- The workbench must be securely anchored to the floor to ensure stability and prevent the risk of tipping.
- Ensure that the workbench is placed on a stable and level surface to prevent it from tipping or wobbling.
- Provide safety information and instructions in understandable language.
- Observe the maximum load capacity of 750 kg to avoid overloading and possible damage.
- Observe the shelf load capacity of 50 kg to prevent breakage and injury.
- Wear suitable protective equipment when working with chemicals and hazardous substances.
- Observe ESD protection measures to prevent damage to electronic components.
- Avoid the risk of electric shock if electrical appliances are handled incorrectly.
- Sharp edges or parts can pose a risk of injury - take suitable precautions.
- Keep children away from the workbench or allow them to work under adult supervision.
- Check the workbench regularly for damage to minimise safety risks.
- Wear suitable protective clothing, especially when handling heavy tools and chemicals.
- Keep the workbench free of excessive dust and dirt to avoid the risk of slipping.
- For storage, observe the maximum load capacity of the shelves (do not exceed 50 kg).
- Do not use in damp environments or outdoors to prevent damage to the material.
