Safety Instructions:

- Choking hazard due to small parts in drawers and improper use of the product. Take protective measures to avoid sharp edges and corners.
- Risk of injury from sharp edges and heavy objects. Use protective measures such as suitable protective equipment, e.g. gloves and safety goggles.
- Observe the maximum load capacity of 750 kg for the workbench to avoid structural damage. Do not use more than 80 kg per drawer and 50 kg per shelf.
- Ensure that the workbench is standing on a stable, level surface and is firmly anchored to prevent it from tipping over.
- Avoid the risk of electric shock due to incorrect operation by using electrical tools safely. Keep liquids away from electrical components.
- Minimise the risk of slipping and falling by keeping the work area free of obstacles. Take safety precautions to ensure a stable set-up.
- Avoid danger from aggressive chemicals, oils and solvents by minimising contact with surface treatment. Observe specific surface care requirements.
- The box-type workbench is suitable for use in ESD areas. Observe ESD protection to protect electronic components.
- Close drawers and doors securely and check their functionality regularly to avoid crushing and hazards during use.
- When using mechanical parts, ensure that all moving parts function properly and are not blocked.
- Carry out regular maintenance and inspection of the workbench and its parts to ensure mechanical stability and to avoid health risks.
- Handle and store product according to specific instructions. In the event of improper use, take immediate safety measures.
