Safety Instructions:

- Ensure that the product has been designed and manufactured in accordance with the relevant safety standards.
- Include safety information and instructions for safe use in understandable language.
- The maximum total load of 750 kg must not be exceeded in order to ensure stability and safety.
- The drawers should not be loaded above the permissible weight of 80 kg per drawer.
- Place the workbench on a stable and level surface to prevent it from tipping or wobbling.
- Do not use sharp or pointed objects on the surface to avoid damage.
- Tools and materials should be stored safely in the drawers to prevent injuries.
- The workbench must be firmly anchored to the floor to ensure stability during use.
- Distribute heavy objects evenly to prevent them from tipping over or collapsing.
- Ensure that the drawers are not overloaded before closing and watch out for crushing hazards when closing.
- Drawers are fully extendable; be careful not to exceed the weight of each drawer.
- Avoid the risk of suffocation from improperly stored small parts or pulled-out drawers.
- Safety checks and regular maintenance of the telescopic rails are recommended.
- Observe ESD protection measures for sensitive applications to prevent damage to electrical components.
- Wear personal protective equipment such as gloves and safety goggles when working with the workbench.
- The workbench is intended for commercial use and is not suitable for children; however, all users must be trained in its safe use.
- Read and understand the user instructions before using the workbench.
- Protect the product from moisture and chemicals to prevent structural damage.
- Not intended for use outdoors or in damp environments.
