Safety Instructions:

- Not suitable for children under 8 years of age.
- Maximum load capacity of the work surface: 400 kg. Do not exceed this to avoid overloading and damage.
- Choking hazard due to small parts in the accessories and improper handling of the drawers. Secure small parts from children.
- Do not overload drawers. Maximum load per drawer: 80 kg.
- Secure the work surface on a stable, level surface to prevent it from tipping and falling over.
- Use on swivel castors: Use the parking brake to prevent the castors from rolling away, especially on smooth surfaces.
- Observe protective measures when handling sharp edges and tools to prevent injuries.
- Do not use the mobile workbench in damp or wet environments.
- Avoid contact with aggressive chemicals to prevent damage.
- Wear suitable protective equipment when working in the vicinity of oils, acids and chemicals.
- Observe ESD protective measures to prevent damage from electrostatic discharge. Use in ESD-protected areas.
- Check regularly for loose parts or damage. Follow the assembly instructions.
- Keep out of reach of children. Use only by adults or under adult supervision recommended.
- Use the parking brake on the castors to prevent unintentional rolling away.
- Be aware of the risk of tripping and falling due to loose parts or unsecured materials.
