Safety Instructions:

- Observe the maximum load capacity of 400 kg.
- When using the swivel castors, ensure that the parking brake is activated to prevent unintentional rolling away.
- Use the workbench on a stable, level surface to prevent tipping or wobbling.
- Regularly check that the castors are secure and stable.
- Do not exceed a maximum shelf load of 50 kg.
- Avoid exposure to heat, liquids and chemicals on the workbench surface.
- Take suitable ESD protection measures when working with electrical devices.
- Keep small parts away from children as there is a choking hazard.
- Check the workbench regularly for functionality and wear before use.
- Pay attention to sharp edges and corners and keep the workbench away from sharp objects to prevent damage.
- Do not use the workbench in humid or extreme temperature conditions to avoid material damage.
- Before use, ensure that all parts are correctly fitted and function properly.
- Regular cleaning and removal of obstacles on and around the workbench to prevent tripping hazards.
- Only use the workbench in accordance with the product description and assembly instructions in order to avoid hazards.
