### Safety Instructions:

- Caution: The cabinet is heavy. Ensure that the cabinet is standing on a stable, level surface to prevent it from tipping over.
- Note maximum load capacity: Depending on the item, 250 kg, 500 kg and 750 kg. Avoid overloading to prevent instability and breakage.
- Observe the maximum load of the shelves: Depending on the item 50 kg, 100 kg, 150 kg. Even load distribution is important to prevent tipping.
- Make sure to distribute heavy objects evenly and store them in the lower area to increase stability.
- Use the cylinder lock to secure the contents and prevent unauthorised access.
- Operate cupboard doors carefully to avoid crushing. Use both hands and close completely to avoid obstacles.
- Do not block ventilation openings to ensure sufficient air circulation and avoid moisture problems. Do not store highly corrosive materials.
- The cabinet must be firmly anchored to prevent tipping.
- Not suitable for children. Keep small children away and avoid dangers from small parts.
- Do not overload the cabinet. Risk of injury if used incorrectly.
- Read and observe the safety information and user instructions carefully.
- Do not use the cupboard as a support or ladder.
