Safety Instructions:

- Do not exceed the maximum load capacity: 250 kg, 500 kg or 750 kg depending on the model.
- Make sure that the shelves are not overloaded: 50 kg, 100 kg or 150 kg depending on the model.
- Place the cabinet on a stable and level surface to prevent it from tipping over.
- Secure the cabinet against tipping over if it is overloaded or used intensively.
- Use the swivel handle with cylinder lock for vandal-proof and theft-proof storage.
- Do not block the ventilation holes to prevent mould growth and moisture accumulation.
- Avoid contact with water or heat sources to prevent rust and damage.
- The cabinet should be assembled and used safely in accordance with the instructions.
- Keep small parts out of the reach of children to avoid the risk of choking.
- The cabinet is not suitable for use by children or intended as a seat.
- Carry out regular visual inspections of the stability, ventilation holes and locking mechanisms.
- Avoid storing hazardous or flammable materials.
- Keep the cabinet dry to prevent rust.
- Regularly check the function of the lock and the door mechanisms.
- Keep children away, risk of injury from tipping over or improper use.
- Load heavy objects on the lower shelves to balance the cabinet.
