Safety Instructions:

- Make sure that the cupboard or shelf is on a firm and level floor to prevent it from tipping over.
- Ensure correct fastening and stability during installation to prevent accidents.
- Check and repair the cupboard or shelving unit regularly for damage to prevent the risk of falling.
- Observe the maximum load per compartment to prevent collapse.
- The maximum load capacity of 1000 kg in the heavy-duty shelving unit must not be exceeded.
- Secure access to heavy equipment and tools with appropriate lifting aids and observe the safety regulations.
- Distribute the weight evenly on the shelves to prevent damage.
- Regularly check the condition of the shelf for signs of damage or wear.
- Take suitable safety precautions to ensure stability and when setting up the shelf to prevent it from tipping over.
