Safety Instructions:

- Observe the maximum load capacity of 1000 kg and do not load the cabinet beyond this.
- Distribute heavy objects evenly and as low as possible to prevent the cupboard from tipping over.
- Ensure that the cabinet is placed on a stable and level surface to prevent it from tipping over.
- Do not open more than one hinged door at a time to ensure the stability of the wardrobe.
- Keep the ventilation openings clear to ensure good ventilation and reduce moisture.
- Follow the manufacturer's installation instructions and use the accessories provided to ensure safety and stability.
- Take care when installing and handling the doors to avoid the risk of crushing.
- Observe child safety: Ensure that the cabinet is inaccessible to children or secured.
- Use suitable lifting aids for heavy machines and tools.
- Regularly check the functionality of the cylinder lock.
- Keep the cupboard clean and free of obstacles to avoid falling accidents.
- Optimum lifting techniques should be used during operation to avoid injuries.
- Check the cabinet regularly for damage that may occur due to improper use.
- Warning: Do not overload the cupboard; do not exceed the load limit of 200 kg per shelf.
- Observe safety instructions for the safe handling of heavy materials.
- Ensure that small parts or chemicals are out of the reach of children.
